

WEB DESIGNING

MUSIC PORTFOLIO WEBSITE

Made by: CHANDAN DUBEY
ROLL NO.: 202501101400013
BRANCH: CSE (CYBER SECURITY)

EXPLANATION OF THE USE-CASE PROJECT:

The goal of your project is to create an interactive online portfolio for a musician (Andrew). It allows visitors to:

- Learn about the artist (About section).
- Listen to or access music tracks (Music section).
- Explore books related to the artist (Book section).
- Check merchandise in the store (Store section).
- Navigate easily and contact the artist if needed.

It demonstrates your skills in HTML, CSS, and basic web design.

  </form>

</body>
</html>
```

DESIGN ELEMENTS IMPLEMENTED :

- A fixed header containing links to different sections of the page.
- Smooth navigation using **anchor links** (`href="#sectionID"`).
- Makes the website easy to explore.

2. Hero Section (Home Banner)

- Large attractive headline:
"ANDREW IS A MUSICAL EXPLORER..."
- Creates a strong first impression and introduces the artist immediately.

3. Section-Based Layout

The website is divided into clear sections:

- Home
- About
- Music
- Book
- Store
- Contact

This improves readability and helps users jump to the content they want.

4. Typography & Content Styling

- Well-written headings (<h1>, <h2>) for clear hierarchy.
- Paragraphs explaining the story, music, and products.
- Clean formatting makes reading easy.

5. Music Table Design

- A simple **HTML table** shows songs with:
 - Serial number
 - Song name
 - YouTube link
- Makes the music list organized and professional.

6. Image Grid Layout (Books & Store Items)

- Uses a **grid-like arrangement** to display:
 - Book covers
 - Store merchandise
- Each item has an image + label, making it visually appealing.

7. Responsive Images

- Images include `alt` attributes (good for accessibility).
- All images automatically scale based on screen size.

8. External Links With `target="_blank"`

- YouTube, Amazon book links, and login page open in new tabs.
- Keeps the main portfolio open while exploring.

9. Minimal but Functional Design

- Clean white background (CSS may style it further).
- Simple layout suitable for beginners.
- No unnecessary scripts or complicated features.

10. Organized File Structure

- HTML file linked to an external CSS file (1st .css).
- Professional project structure:
 - HTML for content
 - CSS for styling

11. Font Awesome Integration

- Font Awesome library included (even if not yet used).
- Allows easy addition of social icons, play buttons, etc.

12. Contact Section

- Provides a way for users to reach out.
- Adds legitimacy and professional value.

THANK YOU
